

Clark Forklift

Presently, there are at least 350,000 Clark forklifts performing worldwide, and upwards of 250,000 in commission in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 exclusive brands of lift trucks, with components covering more than 120,000 specialized parts for all of its automated equipment. Your regional Clark Seller is your complete source for availability of all your components requirements offered by Clark Totalift.

Clark has a exceptional Parts Supply team. The parts warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their customers and their dealers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Motivated to provide the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Clark Totalift has a very impressive international support network. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the material handling market.

Clark proudly remains an progressive leader of the material handling industry, revolutionizing protection features such as the operator restraint system. This exceptional dedication to safety is at this time a standard feature on every forklift.

Clark's continual mission to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift manufacturer across the world to be certified with the internationally accepted quality standard ISO 9001 for every one of their manufacturing facilities. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental restrictions, thus placing them in a prevailing market position.

Supply Efficient Manufacturing

Clark has chosen the structure of "Lean Production" at all of its assembly plants because this method is particularly economical and permits minimal use of resources. Developed to guarantee maximum efficiency, this system is designed to find and acknowledge the most efficient ways for manufacturing facility management. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engineering

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product efficiency while minimizing costs. The contemporary value engineering agenda combines modern product growth and provides superior consumer support and service within the industry.
